Dear Merchants, Kindly take the following instruction into high consideration:

1. It is not allowed to change the location registered in the license to move to

another address unless DET approval is obtained. 2. The trade name on the signboard must conform to the name mentioned in

the license and typed in one size. The trade name must be in both Arabic and English as follows:

- The trade name in Arabic must be placed on the right hand side of the

signboard whereas the English text on the left hand side.

The Arabic text must be in same size of the English equivalent
 The Arabic trade name must be placed above the English equivalent.

3. A commercial permit must be issued for additional signboards and for placing trademarks on the signboard.

4. Text must not occupy more than 50% of the signboard.

5. Shops operating hours must not exceed 12:00 am unless a permit is

issued.

6. Discounts, sales or special offers must not be announces unless a permit is issued.

7. It is not allowed to apply any amendments or change the license details unless approved by DET.

8. Prices must be placed on products and goods. 9. The Consumer Protection Card (Be Right and Know Your Consumer Rights) must be typed and placed visibly above the DET website www.consumerrights.ae

10. Consumers have the right to receive a purchase receipt

11. Announce the sale policy to consumer through suitable applicable

channels (to clarify procedures for goods replacement, repair and refund). 12. It is not allowed to promote products through agents, telephone calls, or

other ways or yelling. 13. Permits must be issued for warehouses of licensed business or

additional offices or kiosks.

14. Restaurants must place a menu in both Arabic and English languages. 15. Place an approved price list for services provided by ladies and gentlemen salons at a visible area.

16. The displayed price list should be inclusive of 5% VAT 17. Invoices must clearly reflect the total amount of the purchased goods,

services and VAT.

18. Avoid promoting or selling or displaying any counterfeited goods.

19. To protect trade marks, it must be registered by the Ministry of Economy. 20. The Department of Economy & Tourism in Dubai has the right to

suspend or cancel the license or impose fines in case of non-compliance with the terms and conditions as well as violation of the legislation in the UAE.

Data Centers

Are you looking for a reliable Tier 1, Tier 2, Tier 3 or even Tier 4 Data Centre? Look no further! We will design and build your entire Data Centre as per your requirements.

FTTH Technical Services LLC is committed to excellence in the data center design/build process. Unlike the traditional design-specify-bid-build process, which costs more and requires more resources to manage, FTTH Technical Services LLC Design/Build Data Centre Construction Strategy condenses the exercise into a clear and concise process. By integrating both design and construction services, a tighter schedule can be met, costs can be better controlled and unforeseen problems can be avoided. Our proven methodology is designed to minimize the disruption of your business during deployment. These are just some of the many services we offer:

- Assessment & Planning
- Design
- Architecture / Engineering
- Equipment Sourcing & Scheduling
- Construction / Installation / Integration
- Commissioning
- Operations & Maintenance
- Monitoring

Our approach to every engagement starts with defining and understanding the project requirements for the data canter and identifying the business objectives. This is followed by an assessment and audit of the available assets and inevitable detriments. We then establish the design criteria and create a preliminary design to summarize the associated project build costs. From this point, the initial design is developed based on the project scope, determined system requirements, and available data canter build budget, both time-wise and dollar-wise. A preliminary project timeline is established to minimizing construction time and ensure alignment with the project budget

Office M3-0304 Liberty Building, Arkan Business Center, Dubai U.A.E | www.ftthdubai.ae

PBX System:

PBX stands for Private Branch Exchange, which is a private telephone network used within a company or organization. The users of the PBX phone system can communicate internally (within their company) and externally (with the outside world), using different communication channels like Voice over IP, ISDN or analog

Small office phone system solutions deliver so much more today than just a dial tone. Today, a small office phone system is increasingly part of a network—Internet Protocol (IP) network that seamlessly ties together data, voice, video conferencing, wireless, instant messaging, and other business-critical communications tools and applications.

IP Business Telephone System makes a basic as well as a sophisticated Business communication more affordable, whether it is a small business or large company. Where the advantages of traditional telecommunications come to a head with the convergence of IP technology, what you get is an IP PBX System. There aren't very many telephone systems out there that do as good a job of leveraging the advantages of traditional telecommunications and also embracing modern IP technology with a view to providing the best Communication Solutions when it comes to business Telephone system.

WI – Fi System:

Wi-Fi is a **wireless** networking technology that uses radio waves to provide wireless highspeed **Internet** access. A common misconception is that the term Wi-Fi is short for "wireless fidelity," however Wi-Fi is a trademarked phrase that refers to IEEE **802.11x** standards.

Wi-Fi networks have no physical wired connection between sender and receiver. Instead, they function by using radio frequency (RF) technology a frequency within the electromagnetic spectrum associated with radio wave propagation. When an RF current is supplied to an antenna, an electromagnetic field is created that then is able to propagate through space.

The cornerstone of any wireless network is an access point (AP). The primary job of an access point is to broadcast a wireless signal that computers can detect and use to establish a connection to the network. In order to connect to an access point and join a wireless network, computers and devices must be equipped with wireless network adapters.

CCTV System:

We excel in CCTV solutions, offering cutting-edge technology and expertise in surveillance. Services Offered:

- . Customized CCTV system design
- . Installation and setup
- . Remote monitoring and maintenance
- . Integration with security systems

Quality Assurance:

Our solutions prioritize clarity, reliability, and compliance with industry standards for unparalleled security.

Project Success:

Explore our portfolio showcasing successful CCTV installations in diverse environments.

Future-Ready:

We stay at the forefront of CCTV technology to meet evolving security needs

Access Control Systems:

Limit access to authorized personnel, guests and visitors and prevent others from entering private areas by having a Car Park Access Barrier or multi-site RFID, ID Card Printing, Time Attendance, or Visitors Management.

Access Control System is designed for areas where need for security is crucial. It protects human life, property and information and provides safe and comfortable environment by limiting unnecessary access to essential areas such as office, building, factory and more. By deploying RFID/Smart Card, Biometric recognition (fingerprint/face) devices and central control units into an access control system, it prevents any possible danger or interference from the outside, which helps to maximize work productivity.

For small, medium to large sized businesses, intelligent standalone/network access control systems can be applied in various ways to fit your security needs. FTTH Technical Services LLC advanced access control solution provides end to end security in protecting your valuable assets, information and safety in any environment. The following information will give you the basic concept of standalone and network system of the access control system.

Intercom System:

We know that all homes are different. That's why our fully licensed and certified technicians can provide you with innovative and tailored intercom systems that meet your home's needs. No matter what the size and style of your home, we can provide you with whole house intercom systems that blend in seamlessly with your family's lifestyle.

From traditional audio intercoms and cordless wireless intercom systems to video intercoms (where you can see who is at your doorstep), just take your pick from our many intercom models and styles. We provide all equipment for you, making it easier for you to set up a five-star security/intercom system in your home.

Hotel Locking System:

We specialize in Access Control Systems, providing advanced solutions for

security and convenience.

SERVICES OFFERED:

- . Customized access control system design
- . Installation of keyless entry systems
- . Integration with security systems
- . Ongoing maintenance and support

QUALITY ASSURANCE:

Our solutions prioritize security, ease of use, and compliance with industry

standards for enhanced access management.

PROJECT SUCCESS:

Explore our portfolio showcasing successful Access Control System

installations across various industries.

FUTURE-READY:

We continuously adopt cutting-edge technology to meet evolving access management needs

Gate Barrier System:

We specialize in Gate Barrier Systems, providing secure and efficient access control solutions.

Gate Barrier System Expertise:

Services Offered:

- . Customized gate barrier design and installation
- . Integration with access control systems
- . Maintenance and support services
- . Cutting-edge technology for seamless operations

Quality Assurance:

Our systems prioritize security, reliability, and compliance with industry standards.

Project Success:

Explore our portfolio showcasing successful Gate Barrier System

installations across various industries.

Future-Ready:

We stay ahead with innovative technology to meet evolving access control needs

SMATV / IPTV Solutions:

We specialize in SMATV and IPTV solutions, offering advanced technology for seamless content distribution.

SMATV SERVICES:

- . Customized SMATV system design
- . Installation of master antenna systems
- . Content distribution for multi-dwelling units
- . High-quality TV reception

IPTV SERVICES:

- . Custom IPTV network design
- . Streaming and content delivery
- . Interactive and on-demand features
- . Integration with existing systems

QUALITY ASSURANCE:

Our solutions prioritize clarity, reliability, and compliance with industry standards for superior entertainment experiences.

PROJECT SUCCESS:

Explore our portfolio showcasing successful SMATV and IPTV installations in residential and commercial settings.

FUTURE-READY:

We stay at the forefront of SMATV and IPTV technology to provide cutting-edge entertainment solutions. Components individually if required, including the IP head end system, equipment rack, UPS, Middle ware, Encoders, switches, distribution network components etc.

Point of Sale (POS) Solutions:

There are many benefits to automating your store with a Point of Sale system. Using a computer in your business provides you with a greater amount of data than can be retrieved with only a conventional cash register. Customer purchase history, item sales detail, stock status reports, monthly, yearly, and seasonal sales data, are only some of the detail information that can be retrieved.

This data is key to grasping total control of your business and increasing sales and profits. In addition to enhancing customer and inventory tracking capabilities, computerizing your store can also help you tighten up on security and employee tracking.

Some additional benefits to be gained by automating your retail store below:

- Reduce costly inventory overheads
- Make better buying decisions
- Enhance relationships with your vendors with timely inventory information
- Save time automate account receivable, accounts payable, Purchase orders, and other accounting tasks
- Speed up your checkout.
- Increase customer service levels
- Use the system-generated customer information to process direct marketing campaigns
- Increase traffic in your store
- Reduce the time spent on Back Office and Inventory functions

Computer systems only previously available to big chain stores are now readily available to retailers of any size and budget. Get the detail data you need to stay competitive with an affordable, reliable point of sale system from FTTH Technical Services LLC.

Annual Support Contract:

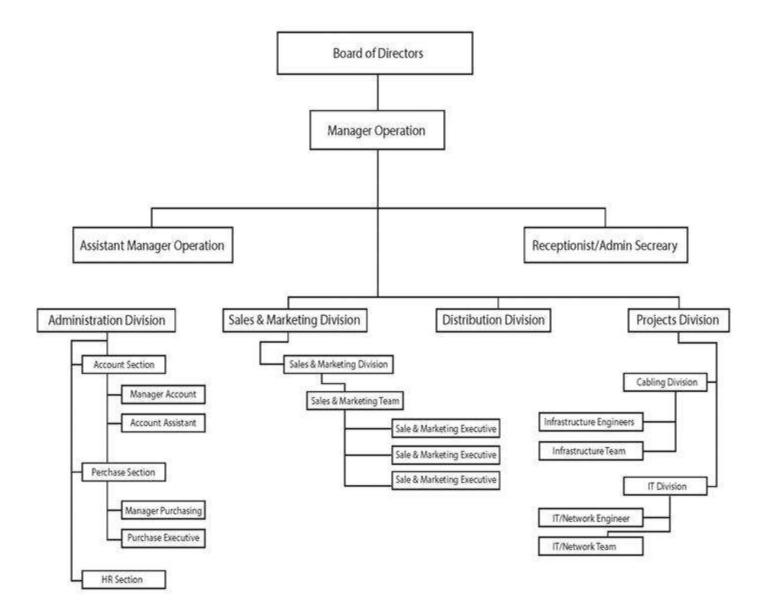

The scope of coverage of the AMC will be all active and passive devices listed in Agreement.

ONLINE MAINTENANCE MANAGEMENT SYSTEM:

ONLINE MAINTENANCE MANAGEMENT SYSTEM:

FTTH TECHNICAL SERVICES L.L.C is the first system integrator, perhaps the only company in UAE who has developed a cross platform (web based) Maintenance Management System & Complaint Analysis Management System Developed by a house software team.

- The system tracks from logging a complaint to closure of the complaint covering the uploading of call closure report with detailed information like Attended by, start time, total time taken and nature of fault with solution provided. The call analysis system goes a step further and identifies item group wise, item location wise, problem wise etc.... This enables for very exhaustive preventive maintenance schedule which enhances the performance and reduces the no. of complaints on a longer run.
- We have already installed the system with a good no. of clients and it has been working successfully for more than 4 years.
- The system reduces the time in logging a complaint as it is web based and logging information can be sent to any no. of mail ids the client prefers.
- The system ensures that a proper & complete record are available for each call logged in and therefore avoid communication problems.
- > The system also fixes responsibility from the customer side as well as from us.
- The system does not interfere with any other ERP or other software installed by the client in their office.
- > It is made user friendly and easy to operate.
- > It facilitates operating the system from various branches or sites.
- The cross platform provides easiness to client to log the complaint through any internet supported devices any time 24x7, from any part of the world.
- The data of each site can be customized to branch level or company level by setting user level rights.
- The system generates default information regarding the login as well as closure and therefore avoids completely manual interventions.
- The complaint analysis system provides information regarding complaints type like maintenance, AMC, Under warranty, Quotation etc.

- 1. Comprehensive and Non-Comprehensive AMC offered by FTTH TECHNICAL SERVICES L.L.C.
- 2. Online Maintenance Management System.
 - a) Online Call Registration.
 - b) Easy Update of required documents.
 - c) Call Status Available 24/7.
 - d) Fastest Response to client complaints.
 - e) Systematic approach to maintenance
 - f) All the required information available at any time.
 - g) Client to be able to keep a easiest track of problems and status.
- 3. Response to all complaints within 4 hours of call registration

COMPLAINT CALL REGISTRATION:

- 1. Online account login through unique id/password.
- 2. Complaint login with details and screenshot upload option.
- 3. Upon complaint registration following details registered/ generated.
 - a. Ticket no
 - b. Customer Name
 - c. Complaint date & time
 - d. site no and name
 - e. Complaint details.
- 4. Complaint registration email can be sent to any no of recipients.
- 5. Complaint status available on login at any time.
- 6. Facility to Bifurcate calls by calls type like: Pending, Closed, Allocated, Pending for Permit Approval etc.

In addition to Online Maintenance Management System, Maintenance Call Analysis system generates Analytical Reports For all Complaints to improve the performance.

- a) Site wise Grouping
- b) Area wise Grouping
- c) Item Group wise grouping, like Camera, DVR, Monitor, etc.
- d) Item Location wise grouping Like entry/Exit Camera, Storage, Lift, Lobby, Monitor1, etc.
- e) problem wise grouping
- f) solution wise grouping
- g) Maintenance & Non-Maintenance Jobs (Quotation Jobs)
- h) Complete Track of all calls with detailed information

ArabCal certifies that the above instrument meets all specifications as stated in the referenced procedure or manufacturer's specification mentioned below unless otherwise it will be mentioned in the attached data sheet or in the comments below. It has been calibrated against ArabCal's Primary and secondary standards whose calibration is traceable through NIST, NPL, DCL or other International/National Standards institutes to the international Systems of Units (SI) or to accepted Intrinsic standards of measurement or whose accuracy have been determined by ratio-type calibration techniques. ArabCal recommends recalibration of this instrument as per manufacturers' specifications/ clients'requirements/standard practices. Pass/Fail of an instrument is decided on the manufacturers' specification or customer requirements.

ArabCal's Quality Management System complies with the requirements of ISO 9001:2015 and ISO/IEC 17025 standard. This report applies only to the instrument identified above and it shall not be reproduced other than in full except with specific written approval of ArabCal. The reported data is valid only at the time of test and it provides no guarantee that the unit will remain accurate between the calibration intervals. Copies of Traceable Certificates are available upon request.

The uncertainty evaluation has been carried out in accordance with EA-4/02; Guide to the Expression of the Uncertainty of Measurement in Calibration, requirements. Reported expanded uncertainty is based on a combined uncertainty multiplied by a coverage factor k=2, providing the level of confidence of approximately 95 % (This statement is only applicable if the datasheet contains uncertainty estimation).

Issuance of this certificate indicates successful calibration (Result of calibration: PASS)
